

Chairman's Message

Dear well wishers,

Our journey, which began in humble roots, is what evolved our optical company into one that takes great pride in enhancing your vision, style, and most importantly, your trust.

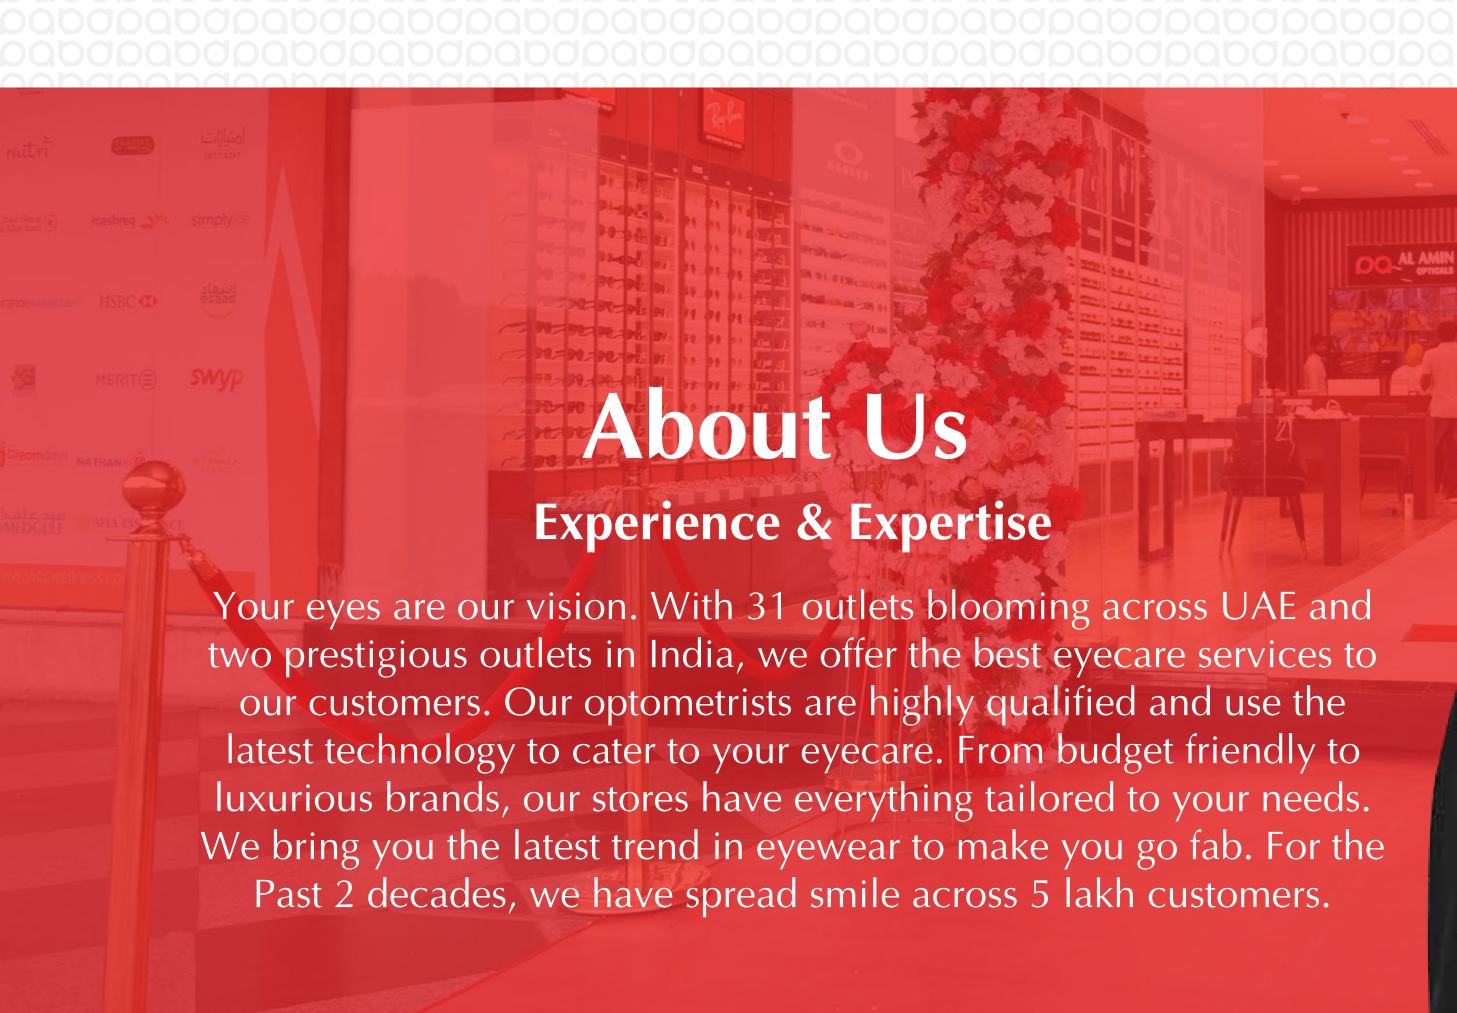

At Al Amin Opticals, our commitment to you is not just transactional; it's deeply personal. We understand the significance of clear vision in your life and the profound impact it has on your well-being. This is what has driven us to continuously innovate, to seek out the finest eyewear, and to embrace cutting-edge technology. It is this unwavering dedication to providing exceptional eye care that has made Al Amin Opticals the reliable name it is today.

As we move forward, our vision remains clear: to be your most trusted eye care partner. We are committed to serving you with dedication, transparency, and a smile. Together, let us continue to explore new horizons in eyewear and celebrate the gift of sight.

Thank you for choosing Al Amin Opticals Group. We look forward to sharing our vision for the future with you.

Warm regards, Dulkifli CP, Chairman

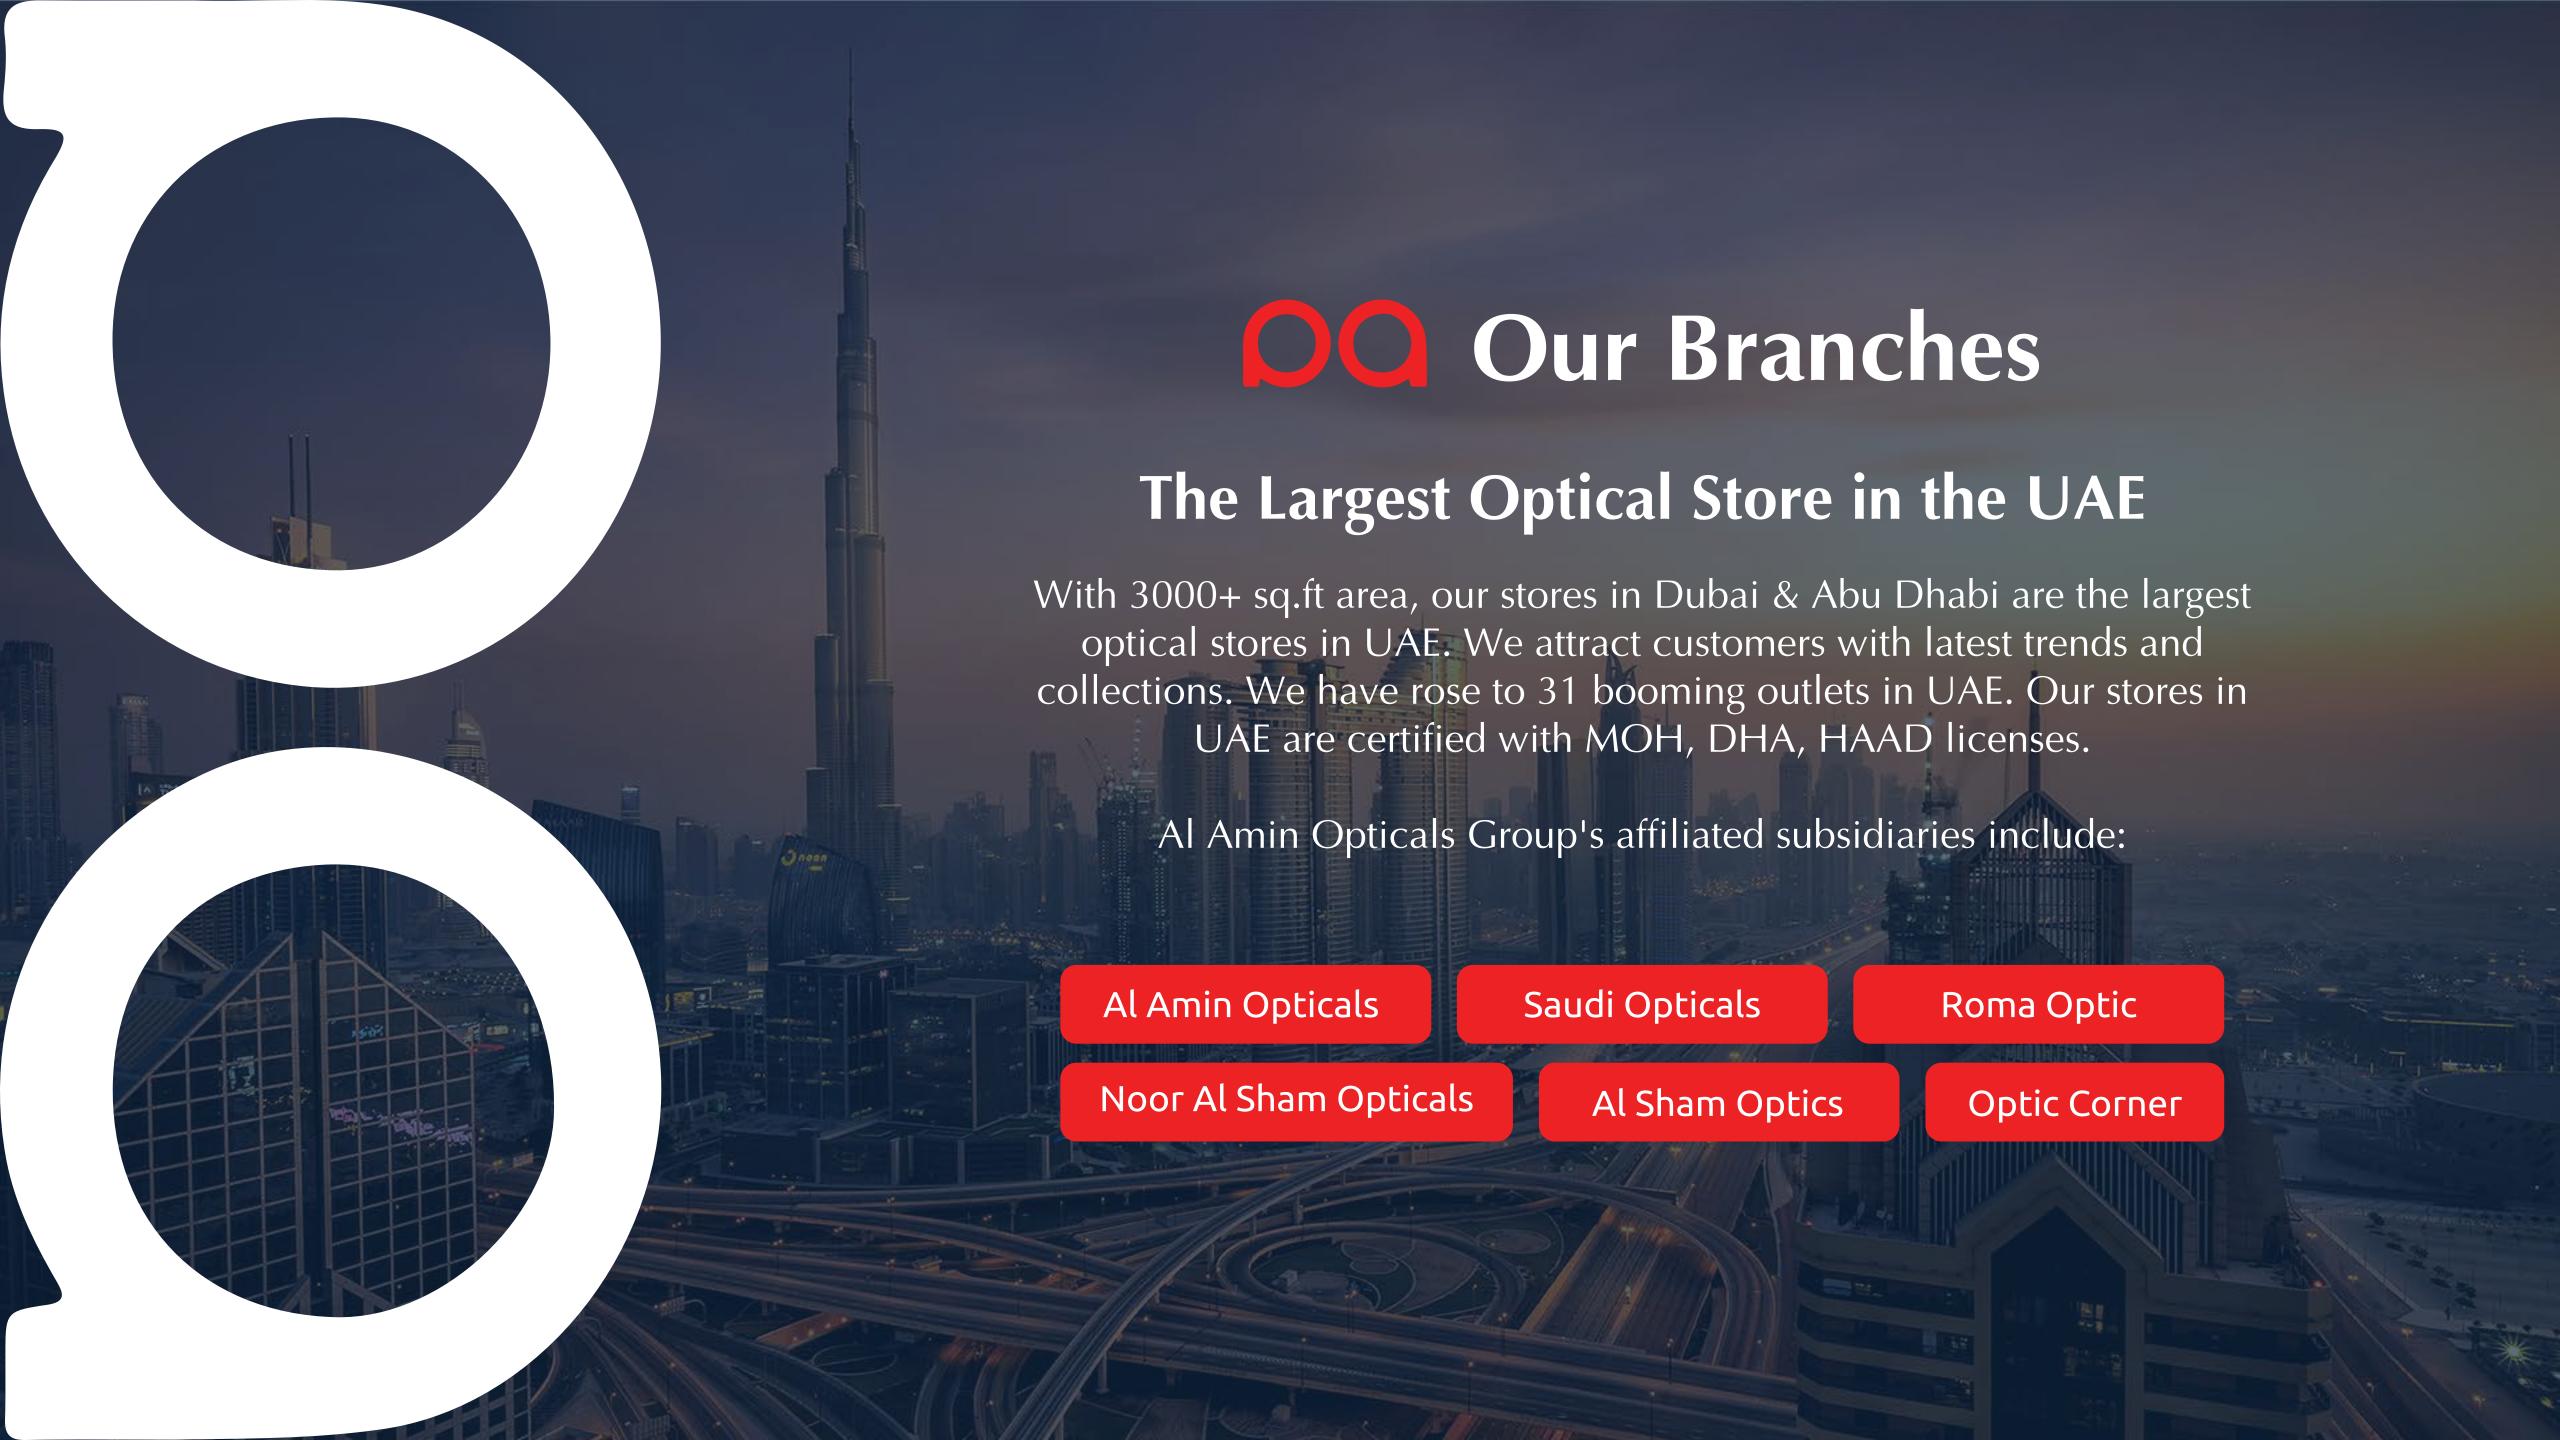

Our Vision

Our vision is to become a premier provider of the highest quality optical solutions loved by our customers and respected for our commitment to their success.

Our Mission

Our mission is to provide the overall best service for customers' needs. Our strategy is to provide our customer with a vast selection of the higher quality frames, sunglasses and lenses at great prices. We support these offerings with access to information and friendly nature. We help our customers to define their personal beauty and to see the beauty in the world.

OC Store list in UAE

Fastest Growing
Optical Chain in UAE

33+ Stores

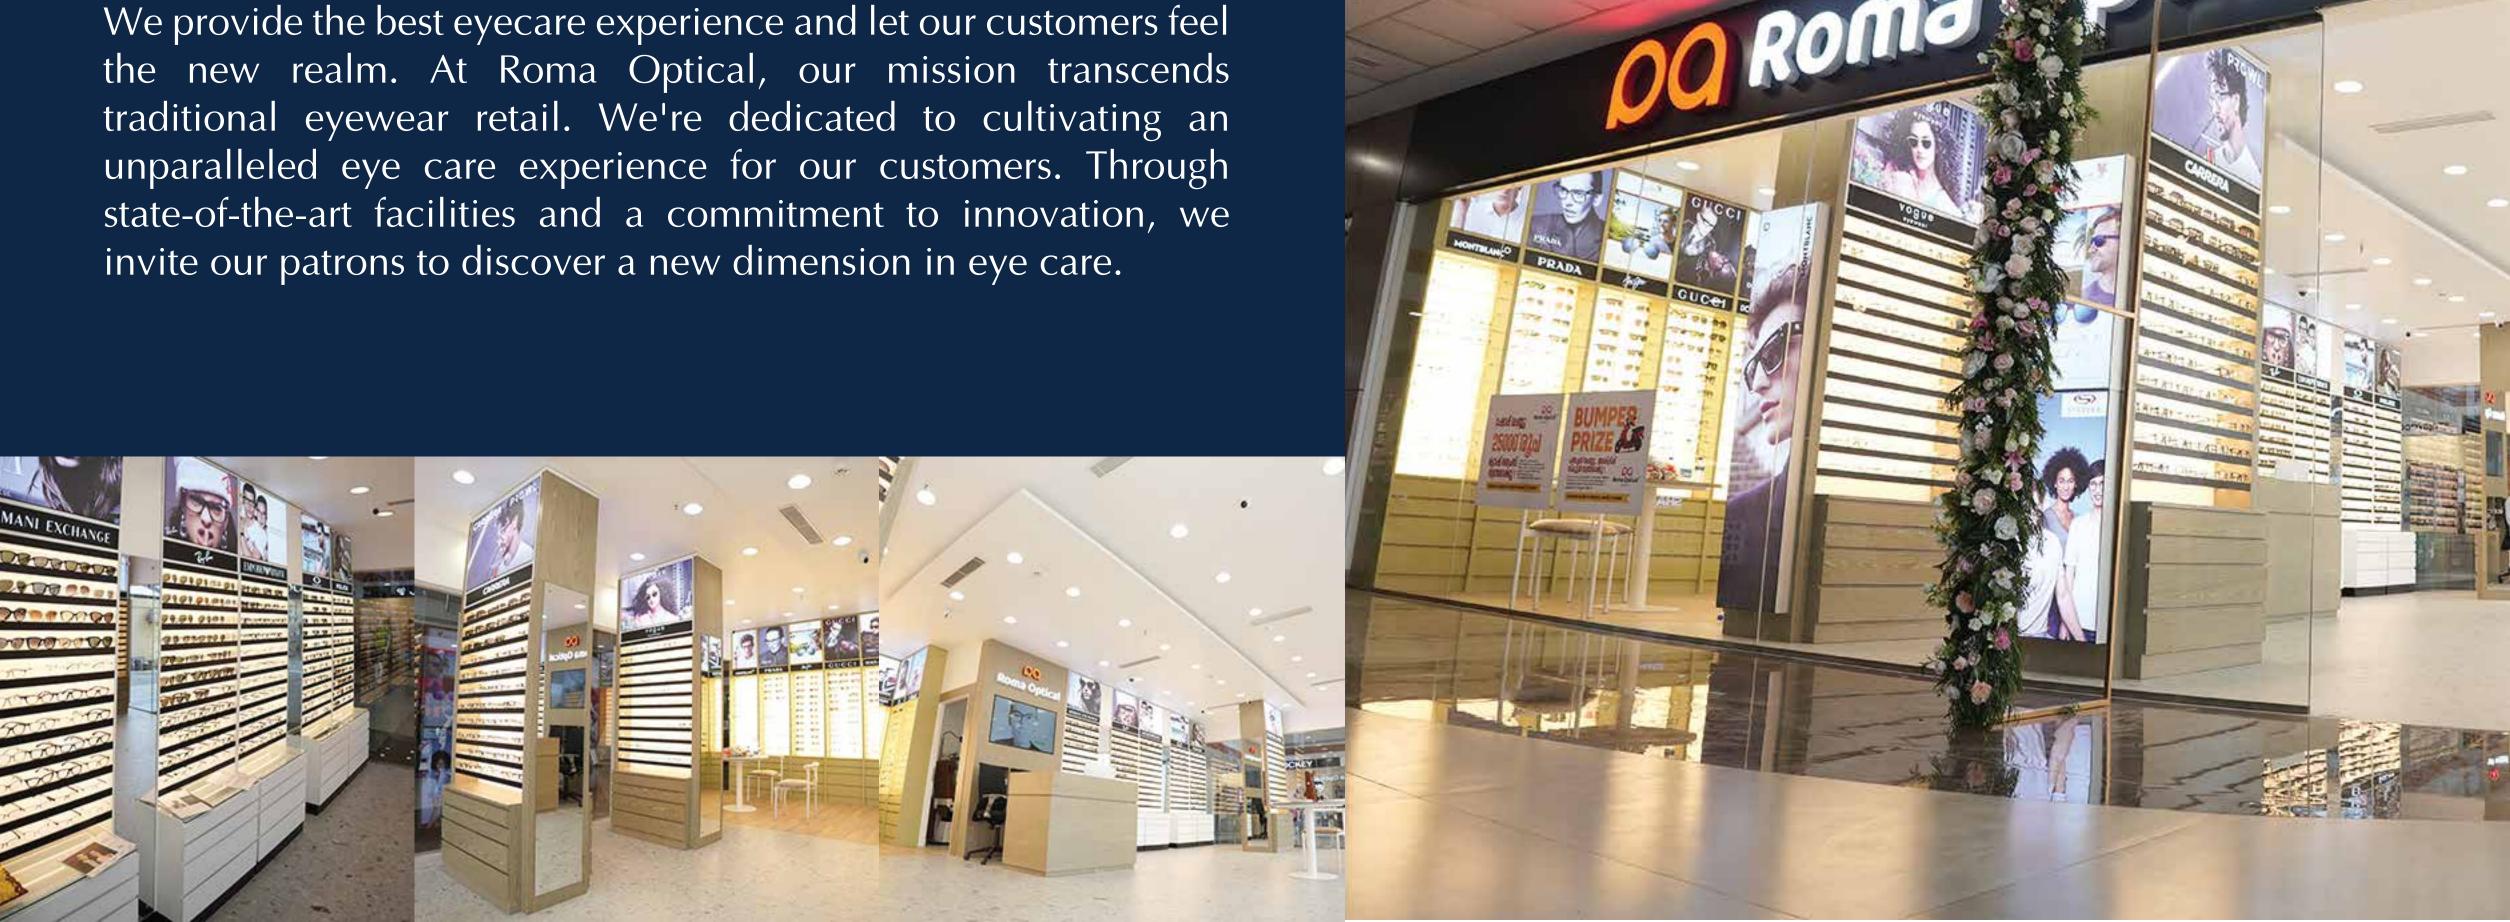

99+ Brands

5,00,000+ Customers

Oo Stores in India

Our stores are the biggest optical store in South India. We have introduced two outlets in prominent locations, the Magnum Mall and Secura Center, bringing top-notch eye care closer to the community. In India, our outlets go by the name Roma Optical. We provide the best eyecare experience and let our customers feel invite our patrons to discover a new dimension in eye care.

OQ Our Services

Contact Lens Fitting

The examiner checks for lens movement in order to assess a flat or steep contact lens fitting. First, the patient looks straight ahead and blinks; in this way the Optometrist observes not only if the lens is in the center, but also evaluates for lens movement. Then, in the slit lamp the contact lens movement in the vertical and horizontal positions is evaluated by having the patient look up, down, right and left. An ideal movement in all positions should be about 0.2 mm to 0.4 mm. The same test is applied for toric lenses and Optometrists have to detect if the lens's mark is stable. The contact lens should be centered in the middle of the cornea and the lens has to cover the entire cornea.

Computerised Eye Testing

A digital eye exam is similar to the old exam you're used to, but many of the manual measurements and adjustments are now computed automatically. In fact, you may have already had one without knowing it. Digital eye exams are showing up in optical shops and optometrists' offices across the country.

After Sales Services

We provide you free fixing and one year support ensuring quality optical services to the customers.

Free Fitting And Adjustment In Store

Choose from a wide range of lens and we will support you with free fitting and adjustment done in our store.

OQ We, Al Amin have one dream

To help not just with people's sight, but a little insight too.

Half of the global population is expected to be living with vision impairment by 2050 due to limited access to eye care facilities. This raises our concern over the vision care around us. There are numerous people around us who just can't afford eye care. Taking this into consideration, we offered free eye camps with a mission to bring clarity and vision to those in need. These camps were strategically set up in areas where access to eye care remained limited. Staffed by skilled optometrists and volunteers, these camps provided comprehensive eye check-ups, and offered consultations, ensuring that individuals from disadvantaged backgrounds received the vision care they deserved.

Through these, we not only addressed a crucial health need but also emphasized the importance of vision in enabling individuals to lead better lives. By eliminating barriers to access and providing vital eye care services at no cost, we made a meaningful impact on the lives of many, emphasizing the importance of vision health within communities that often lack adequate resources for such essential services.

Through Al Amin Opticals, we hope to bring people a clearer and a more beautiful vision through your eyes.

OQ Exclusive Insurance Partnerships

We take immense pride in being direct insurance providers for two esteemed brands: Al Madallah and Neuron Enaya.

Al Madallah: Experience peace of mind with Al Madallah insurance, offering comprehensive eye care coverage for our valued customers in the UAE. What truly sets Al Amin Opticals apart is our exclusive gateway to seamless Al Madallah insurance claims, providing unparalleled convenience and support.

Neuron Enaya: Neuron Enaya insurance is where your optical health meets convenience and affordability. As your dedicated Neuron Enaya partner, Al Amin Opticals simplifies the insurance process, ensuring you receive top-quality eye care services without the usual hassle. Discover Neuron Enaya insurance, designed for the modern individual who values efficient and accessible eye care. At Al Amin Opticals, we make Neuron Enaya insurance work for you by offering easy access to our extensive eyewear and eye care services.

What distinguishes Al Amin Opticals from the rest? We go the extra mile for our customers by providing direct access to these esteemed insurance providers. Unlike other optical companies, we prioritize your convenience, ensuring that your eye care needs are met with unmatched simplicity and expertise. Connect with Al Amin Opticals to explore our insurance partnerships and find the perfect eyewear solutions. Whether you visit us in person or reach out online, you can experience the difference with Al Amin Opticals.

OO Technology We Use

We use high end machines in the industry to ensure you top notch facilities.

Autorefractor

Autorefractor is used to measure the refractive error of the eyes and prescribe lenses.

Retinal Camera

Retinal Camera is used to capture the image of interior surface of the eye, typically the retina. It is a specialized low power micropscop with a camera attached to it. A retinal camera allows the optometrist to study the patient's retina, monitor the changes in the retina over a period of time and diagnose diseases.

Phoroptor

A phoroptor is an eye examination device used to determine a patient's eyeglass or contact lens prescription by presenting and adjusting multiple lenses to assess visual clarity.

Vision screener

A vision screener is a device that quickly checks a person's vision for potential issues, such as nearsightedness or farsightedness. It is often used as an initial screening to identify individuals who may need a more comprehensive eye examination by a professional.

Tono Meter

Tono Meter is used to measure the pressure of the fluids inside the eye-ball.

i.Terminal 2

Experience high reliability thanks to convergence control based on ZEISS patented laser technology. Provide your patients with fast and precise centration results, capturing and calculating individual parameters with the click of a button.

"Al Amin stores Give customers a new vision experience"

ZEISS Center is an exclusive partnership with ZEISS, the worldwide leader in optics and optoelectronics. The center accommodates all the relevant aspects of the shopping experience - from the unique looking store concept, to cutting-edge ZEISS technology and systems.

My Vision Experience by ZEISS correctly identifies a customer's individual vision needs, allowing consumers to choose the eyeglass lenses that are right for them. Supported by trained ZEISS optometrists and modern technology; it is designed for precise vision requirements.

ZEISS VISUFIT Platform

- 1. Precise Measurements: VisuFit 1000 utilizes cutting-edge technology to take highly accurate and precise measurements of the patient's face, including parameters like pupillary distance, fitting height, pantoscopic tilt, and more.
- 2. 3D Imaging: It has 3D imaging capabilities, allowing for a detailed and comprehensive view of the patient's face and eyes, enabling a more accurate fitting process.
- **3. Virtual Try-On**: The ZEISS Virtual Try-on module uses AI to learn from patient interactions. It analyses face shape, skin, eye and hair colour to help you suggest the frames which suit your customer best.
- **4. Monocular Centration**: Monocular centration allows the individual determination of centration parameters for each eye. This method is useful for patients with phoria or alternating vision.
- **5. Easy Consultation Process**: The digital platform is operated via ZEISS VISUCONSULT 500 and is thus completely integrated into your ZEISS consultation process.

Our Strength

Our team of **70+ optometrists** are licensed with DHA, MOH, HAAD certification. We have **150+ employees** providing personalized eye care services, ensuring your vision is in the best hands. Our stores in UAE are certified with MOH, DHA, HAAD licenses.

Exclusively Available In Al Amin Opticals Stores only

Imagine a world for yourself without having the ability to see things. Even the thought of it can leave you anxious, given the importance of the eyes. If we give a thought to visually challenged people, we will appreciate it more than ever. Fenix Lenses help people with a visual challenge by offering optical products developed with extensive research and a quality product design approach. With an impressive history in the UAE, Fenix is one of the most trusted ophthalmic lenses in the region.

Over the years, our policy has been to provide the highest quality products that offer a remarkable visual experience through innovative technological advancements. At Fenix, we use the latest German technology and employ highly skilled engineers to bring you the collection of advanced lenses. Our expert research team continue to analyse the market to innovate the manufacturing and production process of lenses to match the needs of our customers. We continue to pursue excellence in all aspects of the business to serve the community with better products and services.
